

MUHAMMAD RIZKY

AI & SOFTWARE DEVELOPER | AGENTIC AUTOMATION SPECIALIST

Jepara, Jawa Tengah • +62 813-9317-7004 • muhamrizky00@gmail.com • github.com/mrizkymxx • muhammadrizky.dev

PROFESSIONAL SUMMARY

Software Developer & AI Automation Practitioner specializing in **Agentic AI architectures**, **Python/JavaScript** systems, and automated workflow pipelines. Proven hands-on experience running autonomous AI agents (Hermes Agent) on headless server infrastructure, vite coding with modern tooling (Claude Code CLI, Cursor, Spec-Driven Development), relational database management (PostgreSQL/Supabase), and containerized deployments via Docker. Experienced in e-commerce data extraction, NLP machine learning pipelines, and production web services.

CORE TECHNICAL COMPETENCIES

Languages & Frameworks:	Python, JavaScript / TypeScript, Node.js, React, Modern CSS / HTML5
AI & Agentic Systems:	Autonomous Agents (Hermes Agent, OpenClaw), Claude Code CLI, Cursor, Prompt Engineering, RAG & Vector Search, Local Model Deployments
Databases & Backend:	Supabase, PostgreSQL, SQLite, RESTful APIs, Spec-Driven Development
DevOps & Automation:	Docker, Git & GitHub Actions, Linux VPS Deployment, Bash Scripting, Web Scraping Pipelines

RELEVANT TECHNICAL PROJECTS & EXPERIENCE

Autonomous AI Agent Server & Telegram Gateway 2025 – Present

Architecture & System Implementation | Production Environment

- Architected and maintain an autonomous 24/7 unattended AI agent server utilizing **Hermes Agent** and LLM routing gateways with zero GUI overhead.
- Engineered custom tool bindings, background cronjobs, and automated multi-step notification loops directly integrated into Telegram API.
- Integrated **Claude Code CLI** via Model Context Protocol (MCP) and terminal execution pipelines to automate complex code review and refactoring.

E-Commerce Scraping & Sentiment Analysis Engine 2025 – 2026

Lead Developer & Researcher | S1 Skripsi Project

- Built automated Python scraping pipelines to collect and clean 2,000+ customer reviews across 20 verified regional e-commerce stores.
- Implemented NLP preprocessing (case folding, tokenizing, Indonesian stemming) and trained supervised classifiers (Naive Bayes vs. Random Forest) for sentiment classification.
- Delivered reproducible data workflows with automated validation and visual performance metrics.

BSM Production Tracking & Internal ERP Automation 2024 – 2025

Software & Operations Specialist | PT Bintang Sukses Mulia

- Built internal monitoring tools to track purchase orders, production workflows, and shipment timelines.
- Integrated database schemas and automated reporting pipelines, eliminating cross-departmental data discrepancies.
- Configured and maintained ERP modules (Odoo / ERPNext) to synchronize inventory control with logistics documentation.

Full-Stack Web Applications & VPS Deployment 2023 – Present

Independent Web & Infrastructure Projects

- Developed and deployed client websites and personal portfolio (muhammadrizky.dev) with responsive design and modern UX standards.
- Managed Linux VPS configurations, Nginx reverse proxy, SSL certification, and Docker containers ensuring high reliability.

EDUCATION

Universitas Islam Nahdlatul Ulama (UNISNU) Jepara 2021 – 2025 / 2026

S1 Sistem Informasi (Bachelor of Information Systems) | Mahasiswa Tingkat Akhir

Fokus: Software Engineering, Data Science, Machine Learning, dan Enterprise Systems.

CERTIFICATIONS

- **Dasar Cloud & Gen AI di AWS** — Dicoding (2026)
- **Fundamental Pemrosesan Data** — Dicoding (2026)
- **Data Science Certification** — Dicoding (2024)
- **Spec-Driven Development dg Kiro** — Dicoding (2026)
- **Structured Query Language (SQL)** — Dicoding (2024)
- **Data Scientist Professional** — Skill Academy (2024)
